Continuation of rejections discussed: The proposed potential amendments for claims 24 faxed to Examiner on 10/20/06 were discussed. Examiner's supervisor suggests further amendment including "a controller, configures to generate.." to clarify the limitations in the claims. Applicant explained the word "reset" intends to draw to the re-initializing of the system in warm boot manner. Examiner indicated the word "reset" representing either the system re-initializing (warm boot) and/or cold boot power on, thus the "reset" reads on the "power on" limitation in these claims. .
